HOME RENOVATION SUPPORT PROGRAM

Are you planning a
renovation, construction,
excavation or demolition
project in the Trail area?

WORKING TOGETHER
Creating a healthy environment

HOW DOES THIS PROGRAM HELP ME?

Dust stirred up by home renovation projects can expose people to lead and other metals.

This program will help you:

- set up a safe work project
- prevent dust from getting outside the work area.
- protect children, pregnant women and workers from exposure to dust
- transport and dispose of waste materials safely

WHERE DOES THIS PROGRAM APPLY?

The safety guidelines & free services apply to all homes in the City of Trail and Rivervale and pre-1976 homes in Greater Trail (including Rossland & Fruitvale).

Note: New home construction projects should use our Property Development Program. Call (250) 368-3256 for details.

FREE SUPPLIES FOR HOMEOWNERS!

You can get free safety supplies weekdays at the Community Program Office at 1319 Bay Avenue. Call (250) 368-3256. We have:

- Respirators, work gloves & disposable coveralls
- HEPA & shop vacuums
- Plastic sheeting and tarps
- Safety fencing for excavation projects

For information on reducing lead exposure visit www.thep.ca or the Community Program Office.

GUIDELINES TO REDUCE DUST

Before you start:

1. Remove household items from work area
2. Seal off work area from the rest of the house

While you work:

1. Always wear personal protective gear
2. Keep family and pets out of the work area
3. Keep the work area clean & tidy
4. Wash hands & face before taking breaks

Cleaning up can be the most important part!

1. Remove waste and HEPA vacuum the entire space
2. Wash all surfaces (even those you didn't work on)
3. HEPA vacuum again when finished
4. Wash work clothes separately from regular laundry

Outdoor projects:

Use the guidelines above and try not to work on windy or rainy days
